DISA Europe Provisioning Notice 04-03

SUBJECT: Expired CSA Management Function

1. Each DoD Component that uses and owns a Program Designator Code (PDC) for leased communications service will establish and implement an expired Communications Service Authorization (CSA) management function. The purpose of this function is to ensure all commercially provided requirements are under the most current competitive prices, transitioned to non-commercial solution or discontinued when no longer needed.
2. This supports the DoDI 4640.13 policy to acquire and use base and long haul telecommunications equipment and services effectively, efficiently, and economically.
3. Per DoD Directives, DISA provides a central inventory via a web based application to support customers' expired CSA management process. The link is at the following location: <HTTPS://WWW.DISACONUS.DISA.MIL/DSC2/ASP/ECSA.ASP>. You will need to register for an account as outlined on the web.
4. The POC for this notice is the Provisioning and Customer Support Team at DSN 434-5051 or 434-5072.

S. L. TAMASHIRO
CDR, USN
Chief, Provisioning, DISA Europe
